Professional Summary

I am an AI/ML, Data Science, and Automation developer with hands-on experience through internships at VKaps IT Solutions, Infosys Springboard and Acmegrade. Experienced in Python, predictive modeling, Retrieval-Augmented Generation (RAG), AI agents, workflow automation, REST APIs and data analytics. Developed practical solutions involving document intelligence, machine learning, Telegram automation and CRM workflow integration. Strong foundation in software development and data-driven problem solving, complemented by academic exposure to business, finance, marketing and management.

Skills

Programming: Python, SQL, MySQL, MongoDB

AI/ML: Machine Learning, Predictive Modeling, Scikit-learn, Pandas, NumPy, EDA, Feature Engineering

Generative AI: LLMs Integration, RAG, AI Agents, LangChain, FAISS

Automation & APIs: n8n, Workflow Automation, REST APIs, Webhooks, JSON, Telegram Bots

Development & DevOps: Git, GitHub, Docker, Streamlit, CI/CD, Postman

Document AI: PyMuPDF, pdfplumber, Sentence Transformers, Table Extraction

Business & Management: Business Operations, Marketing, Finance, Economics, Management, Entrepreneurship

Work History

AI/Automation Intern - Indore

08 April 2026 - 09 July 2026

VKaps IT Solutions Pvt. Ltd.

- Engineered AI-powered workflow automation using n8n, Python, REST APIs, webhooks and JSON for real-world business processes.
- Built a Telegram AI Agent that processes text and image inputs, extracts structured information and automatically records results in Google Sheets.
- Developed a Healthcare AI Receptionist workflow for WhatsApp and Email using n8n and LLM-based intent detection and response drafting.
- Implemented a human-in-the-loop approval workflow where AI-generated patient responses require staff review before sending.
- Integrated Open Dental and HubSpot to support patient record matching, appointment availability verification, scheduling workflows and interaction logging.
- Implemented RAG-based context-aware automation for customer feedback and email drafting, along with workflow safeguards for human handover and duplicate-action prevention.

AI Intern - Remote

November 2024 - January 2025

Infosys Springboard

- Developed a machine learning-based credit risk prediction solution for credit underwriting.
- Utilized Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn) for analysis and evaluations.
- Conducted exploratory data analysis (EDA) using visualizations to identify trends and handle missing values.
- Implemented and fine-tuned machine learning algorithms and evaluated model performance for credit underwriting evaluation.
- Documented findings in a structured report for stakeholders.

Data Science Intern - Remote

January 2024 - March 2024

Acmegrade Pvt. Ltd.

- Developed a sales forecasting model using regression techniques and machine learning.
- Designed a movie recommendation system leveraging collaborative and content-based filtering.
- Conducted EDA, feature engineering, and data preprocessing for improved model performance.
- Applied and evaluated ML models using appropriate performance metrics.

Education

B.Tech in Computer Science & Engineering: Medi-Caps University, Indore, India (2022 - 2026) | CGPA: 8.59/10

Senior Secondary (XII) - Science: St. Paul Higher Secondary School, Indore (2022) | Percentage: 70.2%

Secondary (X): St. Paul Higher Secondary School, Indore (2020) | Percentage: 83.2%

Certifications

- AI Primer, Infosys Springboard (Aug 2024)
- Agile Scrum in Practice, Infosys Springboard (Aug 2024)

- Principles of Generative AI, Infosys Springboard (Aug 2024)
- Data Science Training, Acmegrade - Mood Indigo IIT Bombay (Jan 2024 - Feb 2024)
- Career Essentials in Generative AI, Microsoft & LinkedIn (Jul 2025)
- Vector Databases for RAG - IBM / Coursera (April 2026)
